

LP Series Linear Programmable DC Power Supply

Models: LP100VDC150W, LP75VDC300W, LP100VDC300W

The LP Series Programmable DC Power Supply is a linear DC power supply featured by its 3U height,ultrahigh resolution and accuracy,SCPI standard communication protocol,flexible match with any other instruments,and integration for testing system of special function.

LP Single Channel

LP Dual Channel

Features

1. Low ripple and noise.
2. High resolution and accuracy (0.1 mV / 0.01 mA).
3. Built-in high-accuracy 5 1/2 digit DC voltmeter.
4. Support for high-accuracy & dynamic programming output.
5. Model LP75VDC300W is dual-channel 75 VDC 2 A output, whereas model LP100VDC150W is 100 VDC 1.5 A output.
6. High brightness vacuum fluorescent display (VFD),four rows of 8-channel simultaneous date output.
- 7.Duel-channel output can be connected in series or parallel to achieve single channel output(External wiring is required).
8. Operating temperature is up to 50°C.
9. Smart cooling system,the fan will automatically turned on/off according to temperatures.
9. Support externally triggered input and output (optional).
10. Start-up self diagnosis, software calibration and 19"standard equipment rack design.
11. Use SCPI standard communication protocol.
12. Built-in RS232 communication interface(port).

MODE	LP100VDC150W	LP100VDC300W	LP75VDC300W
Input Voltage Range	220VAC±10%/110VAC±10%	220VAC±10%/110VAC±10%	220VAC±10%/110VAC±10%

Remark: with - : Not available ; with * : Pending ; with # : will be available in 2017

The SP Series Programmable DC Power Supply is a switch-mode single output programmable DC source with a height of 1U/2U. It is a high-precision programmable DC source using 32 bit D/A & 16 bit A/D sampling circuits, and with a voltage and current resolutions of up to 0.1 mV and 0.2mA, respectively. It supports multi-unit parallel operation mode (maximum 4 units) with a parallel-output. This feature makes the application and test of circuits more convenient and flexible. It also supports in-line (series) operation mode.

below 2000W

Application area:

1. Automated testing sector: can be integrated in the automatic testing system.
2. Communication sector: can be used for the tests of mobile charger and portable power supply.
3. Medical field: can be used for medical device testing or integrated in medical equipment.
4. Automotive sector: support output of modified waveform to simulate the shocks of automobile being hit in a different state.

Features

1. Wide input voltage range (90- 265VAC or 190- 265VAC).
2. High power density, 1U or 2U.
3. Simple Master/Slave and parallel & series mode of operation.
4. With accurate voltage and current measurement capability.
5. High-speed programmable interface.
6. Coded knobs, multifunctional keyboard.
7. Switchable constant voltage (CV) and constant current (CC) operating modes.
8. Functions for gradual rise/drop of voltage.
9. Programmable and multiple ways of setting the voltage/current function.
10. Over-voltage, over-current, over-power, short circuit and over-temperature protections.
11. Built-in communication interface for USB/LAN/RS485/RS232, GPIB is optional.
12. Use SCPI standard communication protocol.
13. With standard external interface and remote output. Remote sense line voltage drop compensation.
14. DVM independent measurement functions.
